

SECURITY AND PRIVACY

Successful healthtech, medtech and biotechs all need to handle **human samples** or human data.

International expansion, processing human samples, or launching a health app can require compliance with many requirements from **GDPR, HIPAA, HTA and ISO** and other regulatory requirements.

Forward-thinking leaders are putting physical, software and data **InfoSec policies** in-place early to seamlessly move to the next steps on their journey.

Fast-growing company translating **university research into the clinic.**

“Their professionalism and kindness in transferring knowledge to incoming scientists has made working with them incredibly easy and has **helped us to grow our capabilities** and team.”

“ Prismaea has provided easy to implement PHI policies. Their breadth of experience across the entire R&D pipeline has been invaluable in growing as fast as we have.

PRISMEA ADVANTAGE

Prismaea’s pragmatic attitude builds from your current ways of working, constraints and processes to protect your IP, your employees and your human samples.

Prismaea’s two principal consultants combine over 20 years experience working in ISO, HTA and highly secure environments - including for the MHRA and clinical trials SaaS.
